Composer's note:

Street Songs uses traditional 'found' texts of the street games played and sung by children through the ages. The texts reflect children's imitations of adult rituals of death and rebirth.

Only in *Oranges and Lemons* is a well known melody alluded to as the basis for a 'cantus firmus'.

Individual movements may be performed separately. When performed complete the published order should be followed. In *Jenny Jones* when more than one singer per part is available, solo voices are suggested in certain parts.

All enquiries regarding the film should be first directed to the publisher.
